

Bachelor of Arts in Music Therapy

** pending Chancellor's Office approval*

The Bachelor of Arts in Music Therapy is a four-year plus internship undergraduate degree that prepares students to be leaders among their communities in the field of music therapy. Music Therapy is an allied health profession in which music interventions are used to address therapeutic or palliative care needs. Our program is designed to generate an understanding of music, human development and exceptionality, clinical practice, and the music therapy process through classroom experience and clinical training in local and community-based settings.

This degree provides not only required core courses in music, clinical studies, and music therapy practice--thereby providing the professional competencies required by the American Music Therapy Association (AMTA)--but also 1200 hours of supervised clinical training (at least 900 of which are completed through the internship process). Completing this degree will prepare students to sit for the certification exam with the Certification Board for Music Therapists (the MT-BC credential).
