

Department of Management

Jack Brown Hall, Room 461

(909) 537-5731 Department of Management website (<http://management.csusb.edu>)

The university offers concentrations in Entrepreneurship, Hospitality Management, Human Resource Management, International Business, and Management within the Bachelor of Arts in Administration (<https://catalog.csusb.edu/colleges-schools-departments/business-public-administration/administration-ba/>) and Management within the Master of Business Administration (<https://catalog.csusb.edu/colleges-schools-departments/business-public-administration/mba/>). Human Resource Management and Management courses are offered in support of these programs. Each of the concentration areas is briefly profiled below:

Human Resource Management - People are a firm's most critical resource. Our Human Resource Management program exposes students to the key knowledge and current practices that prepare them for a career in helping organizations find the right talent, develop that talent, and manage them effectively to ensure that the firm's goals are achieved.

Management - Any successful career will involve a role in managing people and resources for an organization. Effective management is critical for an organization to meet its objectives and for an individual's career to continue to develop upward. Management is not innate – it is a skill that can be acquired and developed. Our program teaches students the knowledge and skills to productively with other people, build and coordinate capable teams, and assume the challenges and responsibilities of leadership in a global economy.
