1

Minor in Entrepreneurship in the Sciences

This minor will serve students in the College of Natural Sciences that desire to blend their primary area of study with entrepreneurship. The primary goal of the minor will be to teach science students essential skill sets in entrepreneurship to enhance their careers after graduation. In addition to learning applicable tools to bring their ideas to market, the program will also provide guidance to help students become entrepreneurial thinkers that will benefit them as employees, managers, leaders, and/or business owners.

Required Courses (18 units)

| Total Units | | 18 |
|--|--|----|
